

deepbox

**Stop sending,
start sharing.**

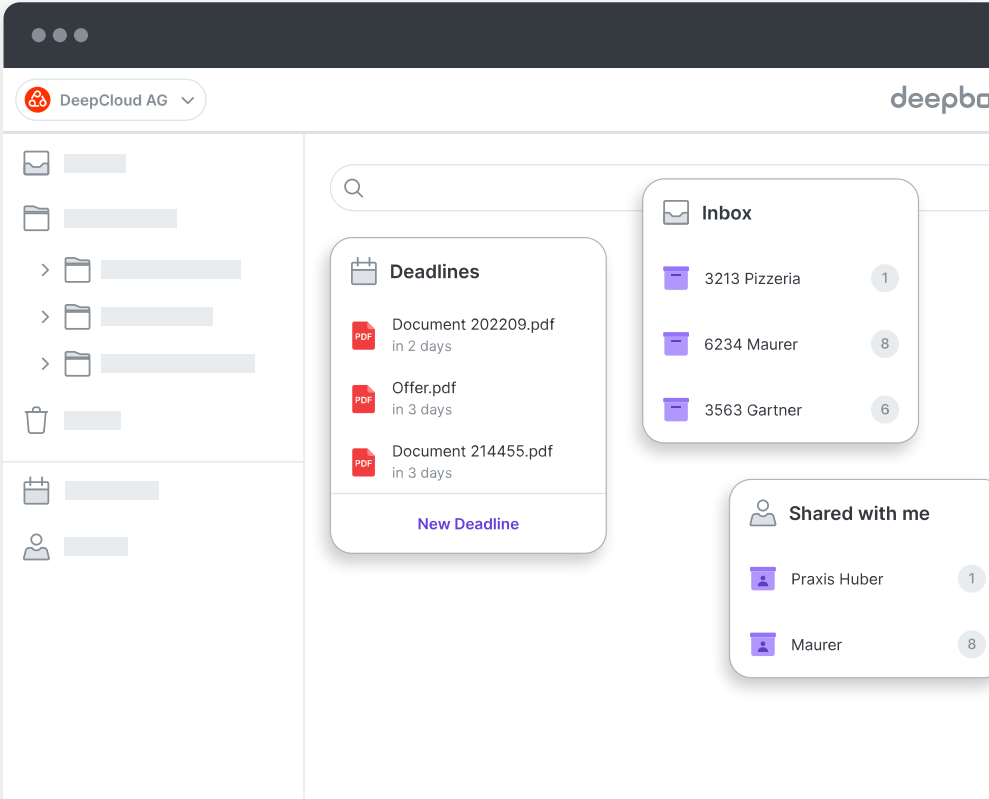

DeepBox lets you process, store and share documents in a secure and automated cloud environment.

DeepBox is the secure all-in-one Swiss document sharing platform.

Document sharing is often complex and inefficient due to content duplication, redundancies and excessive manual input. But with the DeepBox document sharing platform, you can securely collaborate on your files,

classify them automatically and analyse relevant data. Our enterprise systems empower organisations to process any kind of document important to your business.

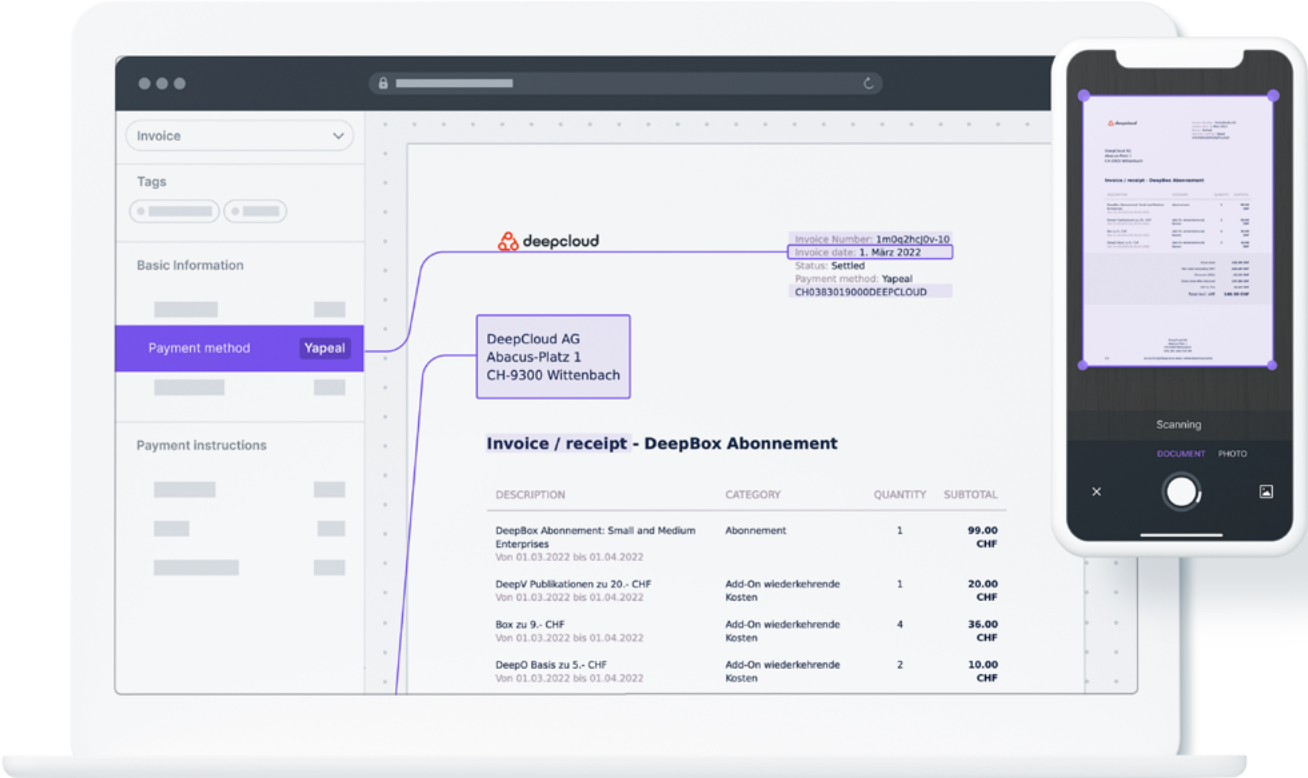

Seamless data processing.

Cognitive data capture technology and automated processes let you acquire, analyse, tag, classify, filter and retrieve your documents faster and

more efficiently than ever. DeepBox smooths your professional workflows through its native integration with Abacus, the Swiss leader in ERP soft-

ware. Automated data acquisition and file classification means maximum efficiency with Abacus and 21.AbaNinja.

Enable effective collaboration through a secure and highly automated digital platform.

Smart document organisation

When you upload your documents to DeepBox, our advanced cognitive data capture technology labels your docs with information-rich digital tags so you can save, share, filter and retrieve your documents fast and efficiently.

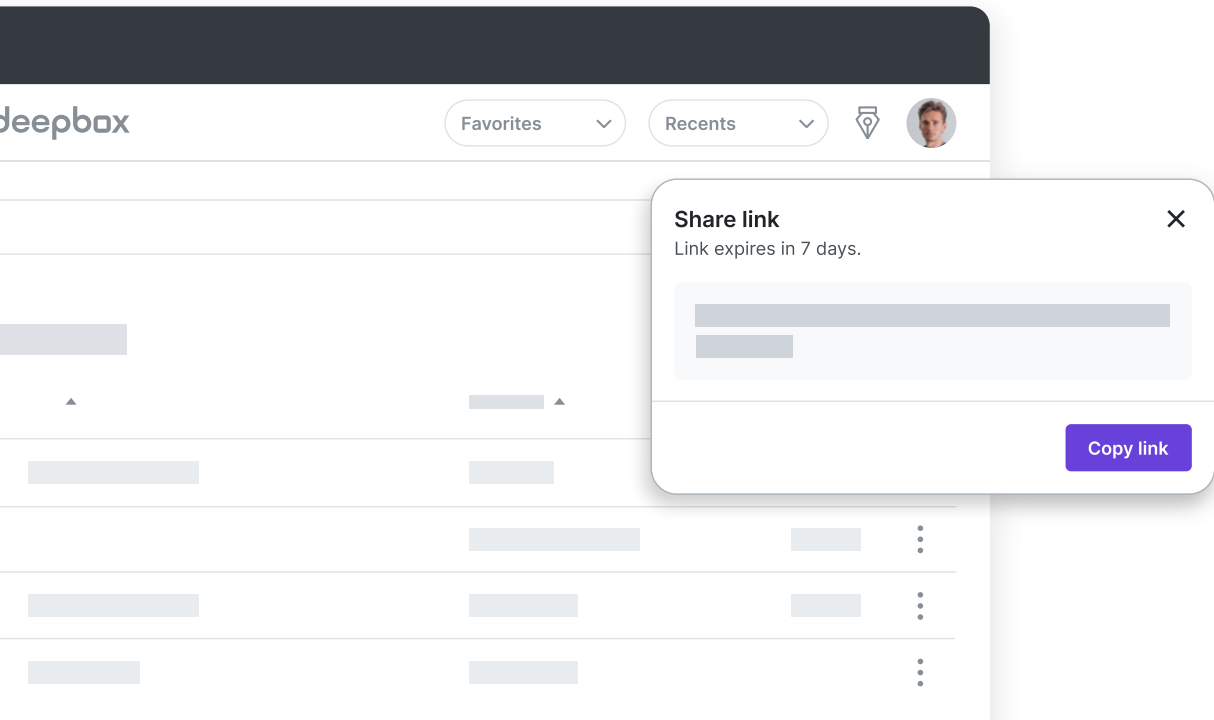

Swiss security standards

The cloud solution of DeepCloud AG is ISO 27001:2013-certified and stores your data in Switzerland. You can rest assured that your most important documents are protected by world-leading security standards.

Secure document sharing

Make document sharing secure and efficient with DeepBox. Document sharing on secure Swiss servers means you and your teams, partners and customers always have safe access to the same data.

Built-in features

Cognitive data capture

Automated document analysis and recognition helps you eliminate unnecessary manual input. Well beyond standard OCR, our industry-leading cognitive data capture AI recognises document types and semantics to transform analogue data into digital for easier processing.

Digital identities for safe sharing

Create secure unique electronic identification among the businesses and individuals you work with. This special DeepBox capability means you can be sure that the people you share with are verified, known and safe.

Electronic signatures

Using DeepSign, start any signature process with your legally valid electronic signature within the secure DeepBox environment. DeepSign meets prevailing EU, Swiss and international standards (SES, AES, QES).

Interactive data visualisation

Available to Abacus customers with DeepBox, DeepV is the interactive data visualisation solution for externally collaborating on confidential company information. With DeepV you have total control over which datasets you share, who can comment, and for how long.

Integrable capabilities

Processing documents with Abacus

Abacus is the Swiss leader in enterprise ERP software. For all Abacus ERP users, DeepBox lets you fully automate data entry to save time and eliminate inaccuracies. Our AI helps you work faster and free up time for your clients while still always retaining full control over how your documents are processed, managed and stored.

Digitalised company incorporation

Hoop is an innovative App offered by DeepBox for the incorporation of companies through an easy and fully digital process. From entering the incorporation data to creating the company incorporation account and registering it.

Processing documents with 21.AbaNinja

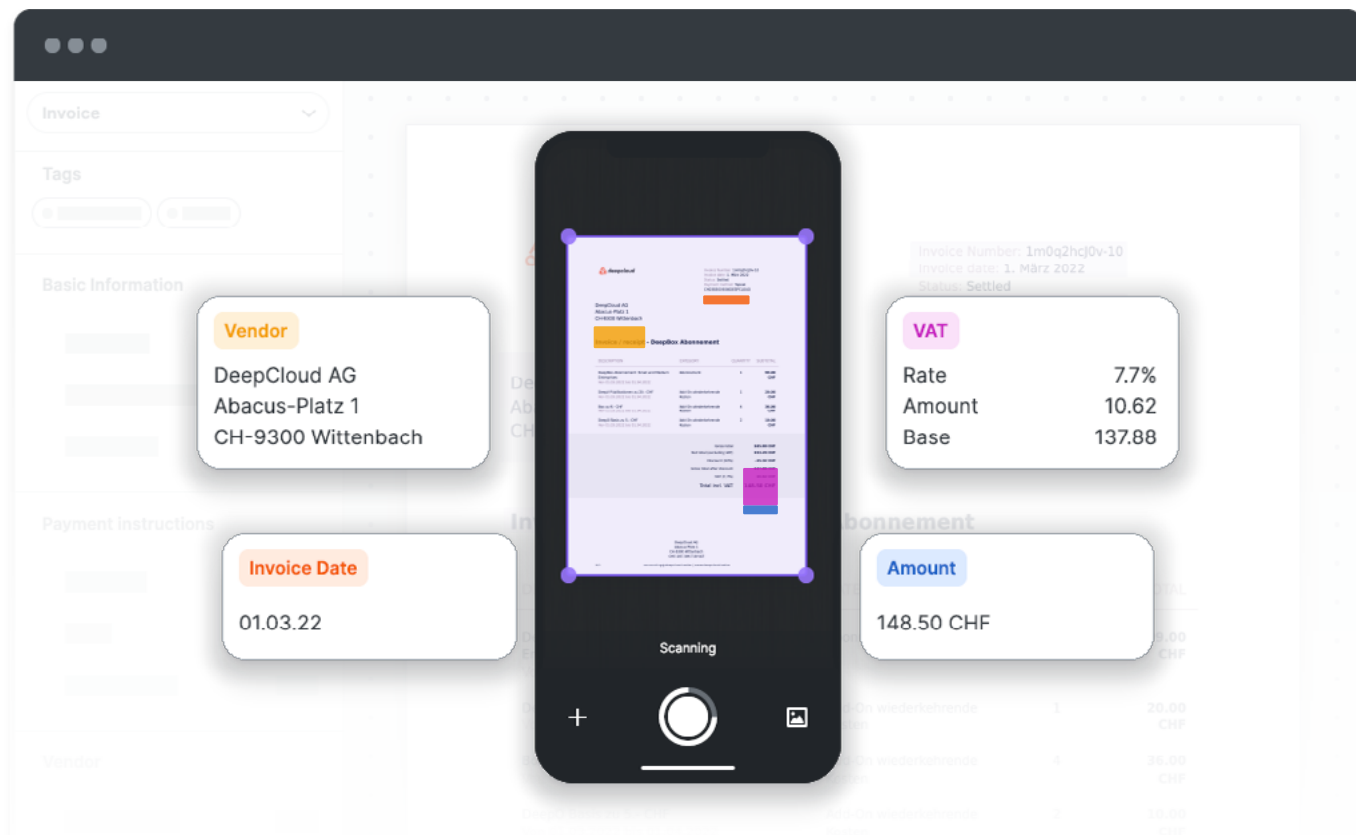

21.AbaNinja is the cloud accounting tool for start-ups and small businesses. For all 21.AbaNinja users, DeepBox lets you fully automate data entry to save time and eliminate inaccuracies. Our AI helps you work faster and free up time for your clients while still always retaining full control over how your documents are processed, managed and stored.

Online payments

YAPEAL is the Swiss fintech company helping revolutionise expense management with intelligent, automated solutions. You can apply for your YAPEAL expense account directly from DeepBox and get bills to your fiduciary with greater accuracy and speed.

Everything at your fingertips.

Digitalise your paper documents

Mobile

Get the DeepBox mobile app to scan any paper document and digitalise their content, easily and up to the last piece of data.

🍏 Available for iOS 14.1+
▶ Android OS 5.0+

Continue to work offline
