

**Make
your client
onboarding
safer.**

Client identification in minutes.

DeepID is the versatile digital identity solution from DeepCloud AG, innovative Swiss company delivering intelligent cloud solutions. DeepID

helps you make your remote client onboarding experience safer, smoother and faster, while saving you time and money.

Smoother processes.

DeepID makes business easier for you, by providing a secure identification process while freeing up time for you to concentrate on your core business.

Happier clients.

DeepID makes business easier for your clients, by enabling you to provide a smoother remote onboarding process and an electronic identity they can reuse.

Verify companies and identify people.

Switzerland's only digital identification solution designed to verify companies as well as natural persons, DeepID lets you identify any company listed in the Registry of Commerce of Switzerland, so you know who you're working with. DeepID is brought to you by DeepCloud AG, innovative Swiss company delivering intelligent cloud solutions.

Verifying companies

- › Company verification is based on the identification of natural persons and the Registry of Commerce of Switzerland
- › DeepID can verify any company listed in the Registry of Commerce of Switzerland
- › Company signatures validated via registered signature authorities (coming soon)

Passporting

- › Secure, customer-approved, transmission of identity data
- › Fast, easy integration without technology dependencies
- › Client identification available as PDF report and data feed
- › Add-on services available to accelerate client screening and onboarding

Identifying people

- › Passport data extraction and validation via NFC
- › DeepID is based on an identification process compliant with ETSI standards
- › DeepSign integration for legally-binding electronic signatures
- › Supports ICAO standard passports and national ID cards
- › Simple integration via REST services

Security

- › All data is stored and processed in a secure Swiss cloud solution
- › No personal data is stored on the device after identification is completed
- › Solution available in one app, featuring hardware token for two-factor authentication
- › Personal data is controlled by the client, with no unauthorised access or data sharing
- › Built-in fraud and duplicate detection
- › Strong two-factor authentication with no password to avoid phishing

Really know who you're working with.

When it comes to onboarding your customers securely and efficiently, trust is no longer enough. Switch to a secure, certified digital identification solution that provides verified identities that can be flexibly repurposed in different contexts, like banking and insurance. DeepID makes onboarding safer, smoother and faster, so you get happier clients and more time to focus on your core business.

YOUR ONBOARDING PAGE

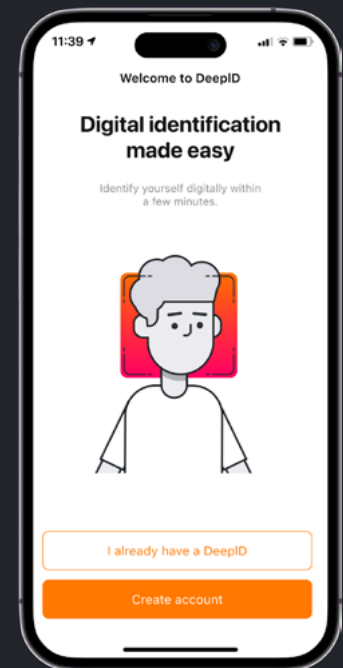

Easily integrate
DeepID into your
onboarding flows.

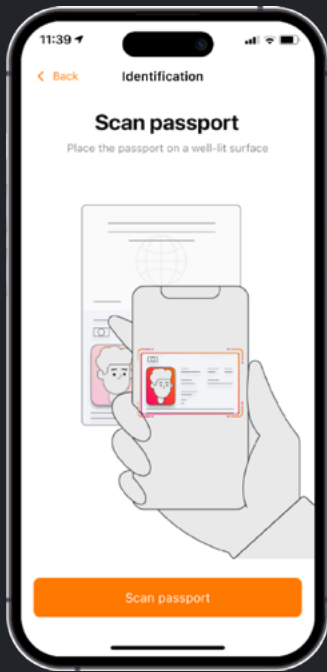

Whatever your business, you can seamlessly integrate DeepID into your own registration flows, to enable a smooth, secure, fully digital onboarding experience.

DEEPID

Your client
authorises your
identification request.

The identification process begins with a request for identity verification, which the customer authorises by means of a qualified electronic signature (QES). With data processing 100% in Switzerland, your identification flow is safe and secure from end to end.

DEEPID

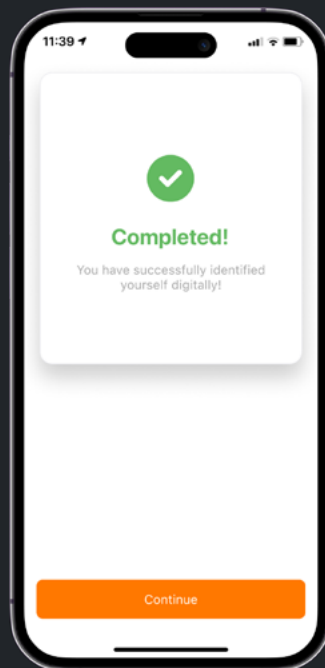

Identification and verification are accomplished in minutes.

Impress your clients with how easy DeepID makes identification. Confirm your client's identity in minutes and accelerate your onboarding process.

DEEPID

DeepID manages the process and keeps you safe.

From passport scanning to data processing, DeepID manages the entire identification and verification process. This helps stop attacks from scammers, while making it easier for your legitimate clients.

YOUR ONBOARDING PAGE

Welcome your identified and verified clients on board.

Once you identify the people and verify the companies who want to work with you, you can safely complete your onboarding process.

Competitive advantages for **your business** and **your clients**

Replace outdated legacy technology with a state of the art solution, fully compliant with ETSI standards.

Offer your clients the opportunity to use their digital identity to sign contracts with the qualified electronic signature (QES) from DeepSign.

Enjoy a plug and play integration with your corporate platforms, with no technical dependencies.

Outsource complexity to a Swiss service and identity provider.

Empower your clients with their own digital identity, a valuable service they can reuse with a simple click.

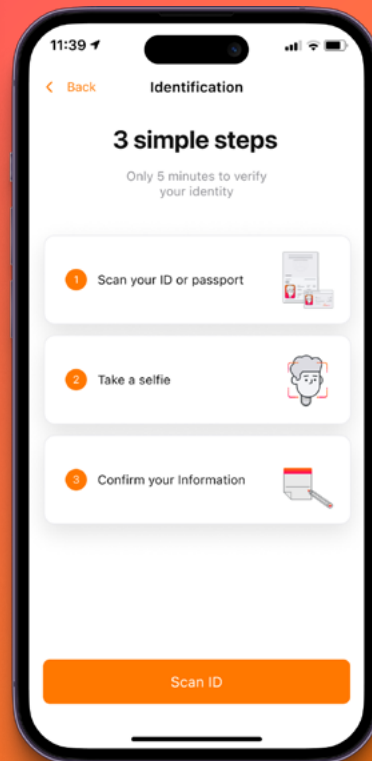

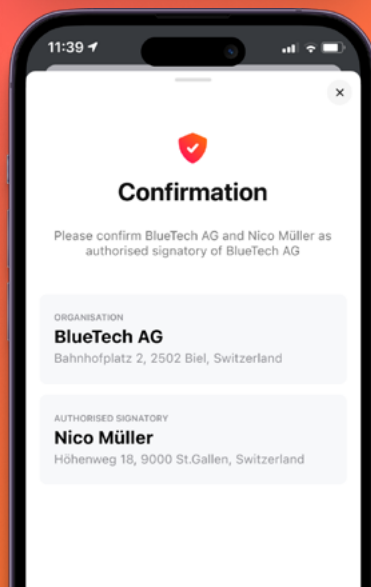

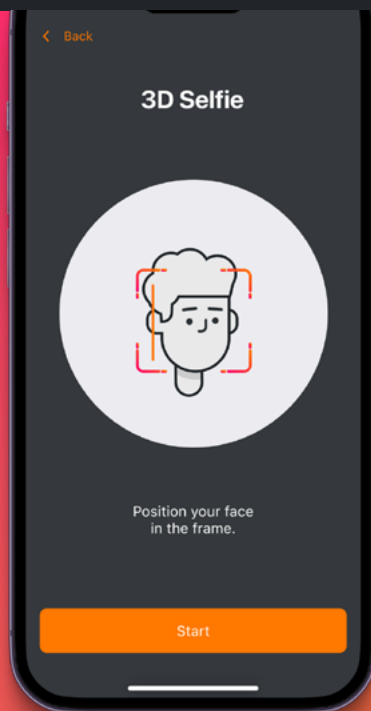

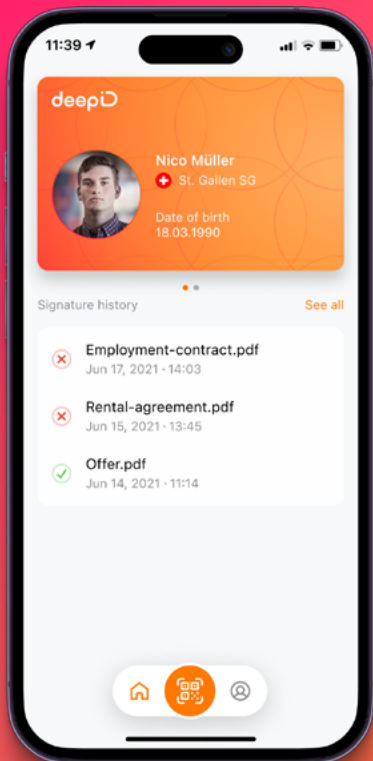

Digitalise and automate your processes to save money onboarding your clients.

Stay sharp with accurate identity scoring and alert notifications for your internal due diligence processes.

Give your clients full control over their privacy and who they share their data with.

One flexible solution that works for any industry.

Banking

Make it easier for customers to open accounts online with fast identification and verification.

Insurance

Protect your company from digital fraud while ensuring a fast, secure onboarding process for your customers.

Consumer credit

Expedite customer selection for happier loan customers while protecting yourself from fraud.

Telecommunications

Sign up more customers with a streamlined SIM card application process based on secure identification and verification.

Public administration

Provide advanced online tax and administration services via a secure, simple account opening process.

Crypto

Confirm customer identities easily to enable hot wallets and cryptocurrency trading services, while preventing money laundering and identity theft.

Healthcare

Deliver confidential information and online services to patients using verified identities and data stored uniquely in Switzerland.

Online marketplaces

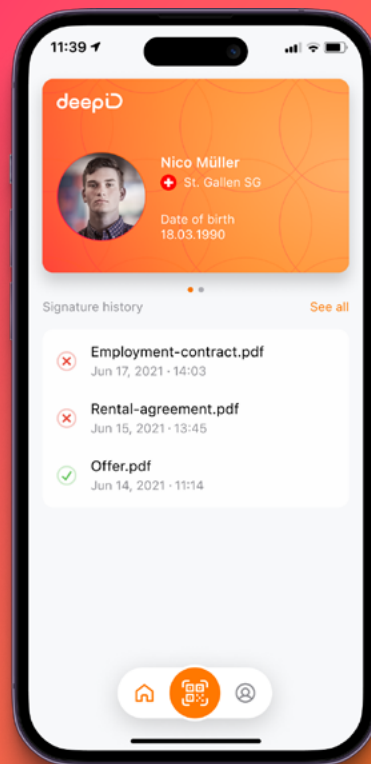

Enable identification as an advanced option to make transactions safer between real buyers and sellers.

Easy digital identification

DeepID lets people verify their identity quickly, easily and securely from anywhere.

Complete your verification in just 3 simple steps and use your verified digital identity to sign documents

digitally with DeepSign or access a range of other digital services. The DeepID app is free to use.
